**Subject:** Hoosick Falls/Petersburgh = Newburgh

Judith,

It was a pleasure meeting you face-to-face at Newburgh's session.

There's so much information to absorb and try to make sense of it all at the same time, it's a full time job.

One question... is there a PFOA blood level that's "safe", other than zero! I question it because the national average is 2.08 but has anyone given a guideline? The EPA gave us 70ppt for water, but I can't find anything on blood.

Thanks!

Michele Baker
